About Me

Software Developer with 6 months of hands-on experience in MERN Stack development, specializing in building responsive and user-friendly web applications. Passionate about writing clean, maintainable, and efficient code while following best development practices. Enthusiastic about solving real-world problems through technology and continuously learning new tools and frameworks. A quick learner with strong problem-solving abilities and contributing to innovative projects that create meaningful impact.

Skills

- Javascript
- Frontend Development
- Node.js & Express.js
- React.js
- MongoDB Database
- RESTful Web APIs

Projects

E- Commerce Website

Developed a MERN Stack e-commerce application with user authentication, product management, shopping cart functionality, and responsive design. Integrated REST APIs and MongoDB for efficient data handling.

Smart Parking System

Built a smart parking management system using MERN Stack to help users find and book available parking slots. Implemented real-time slot tracking, user authentication, and database management for seamless parking operations.
